

ARE YOU IBC COMPLIANT? THE VMC GROUP IS THE LEADER IN EQUIPMENT CERTIFICATION

Since 2002, **The VMC Group** has been providing IBC Certification to Fortune 500 manufacturing companies of HVAC, power generation, and fire protection systems.

The VMC Group:

- ◆ Ensures that manufacturers are in compliance, maintain "on line" performance and carry IBC qualification and certification
- ◆ Is a provider of turnkey solutions for IBC Certification and OSHPD Seismic Qualifications

THE Leader in IBC Certification

The VMC Group was the first agency to obtain certification as a "Seismic Qualification Agency." This certification ensures that our qualification and certification services are provided in accordance with IBC requirements.

Our seismic qualification and certification services are in accordance with:

- ◆ International Building Code (IBC)
- ◆ OSHPD/California Building Code
- ◆ ICC-ES AC156
- ◆ ASCE Standard 7

Our equipment seismic qualification services are based on both analysis and shake table testing.

The VMC Group, through its proven IBC/OSHPD Signature Methodology™, provides:

- ◆ Development of product matrices
- ◆ Management of shake table testing
- ◆ Performance of structural analysis and mathematical modeling (FEA modeling)
- ◆ OSHPD/OSP preapproval service
- ◆ When required, PE Stamps for all 50 states and California SE stamps where required
- ◆ Issuance of the certificates of compliance and product labeling required by code

Let us demonstrate how **The VMC Group** can help you with your equipment certification through **The Power of Together™**.

The VMC Group helps equipment manufacturers find solutions to meet the labeling and certification requirements to ensure compliance.
